

Challenge Word Study Super Word Web Directions

The super word web is a strategy that uses a visual organizer to develop depth and dimension of word knowledge for the students.

The first step is to look the word up in your dictionary for its definition and compare it to the sentence on the page.

Next, write three synonyms for the vocabulary word. A dictionary may contain synonyms but a thesaurus will be a better reference book.

In the ovals, write words that create pictures of the vocabulary word.

The example at the bottom of the page should be a description of the vocabulary word.
