

Picture Dictionary Pages Instructions

Picture dictionary pages give the students a visual aid to help them understand the vocabulary words. This activity will expose the students to guide words, pronunciations, as well as to word meanings.

The students should first look up the word in the dictionary. Next, they write the guide words found at the top of the left- and right-hand corners of the dictionary page where they found their word.

The students write the word, its syllables, pronunciation, part of speech, and definition. They then draw a picture to represent the word, and at the bottom of the page, write the word in a sentence.
